CAREER OBJECTIVE

I'm Mahbub alam siam, a dedicated fresher skilled in web development and various software tools. My expertise includes front-end technologies like HTML, CSS, Bootstrap, Tailwind CSS, and JavaScript, with jQuery for interactivity. I also work with PHP, Laravel, MySQL, and React.js to build robust applications. Additionally, I'm proficient in MS Word, Excel, and PowerPoint, enhancing my versatility. I'm eager to grow and make a meaningful impact in tech.

PROJECTS

Portfolio Website

- Developed a personal portfolio website using HTML, CSS, Bootstrap, and JavaScript to showcase projects and skills.

E-commerce Website

- Built a basic e-commerce application using PHP and Laravel, allowing users to browse products and manage a shopping cart.

Blog Management System

- Developed a dynamic blog management platform using PHP, MySQL, and Laravel. Implemented CRUD (Create, Read, Update, Delete) operations for blog posts and categories, user authentication, and a comment section.

Restaurant Website with Online Menu

- Developed a responsive restaurant website using Bootstrap and jQuery, including an interactive menu that allows users to filter dishes by category, with pop-ups for item descriptions and images.

Online Quiz Application

- Created an interactive quiz app using JavaScript, HTML, and CSS, featuring timed questions, score tracking, and a summary page. Optimized for both desktop and mobile devices.
